

Dare forward!

About us

We don't just solve engineering challenges—we redefine what's possible.

We are a **team of professionals** who believe in technology and its power to transform the world around us for the better, offering complete design and engineering services in the industrial field.

Through a continuous learning process and by cultivating a culture of courage to solve engineering challenges that seem unsolvable, **we empower people to dare.**

Who we are

Over twenty-five years. Hundreds of critical projects. One consistent outcome: operational excellence that drives competitive leadership.

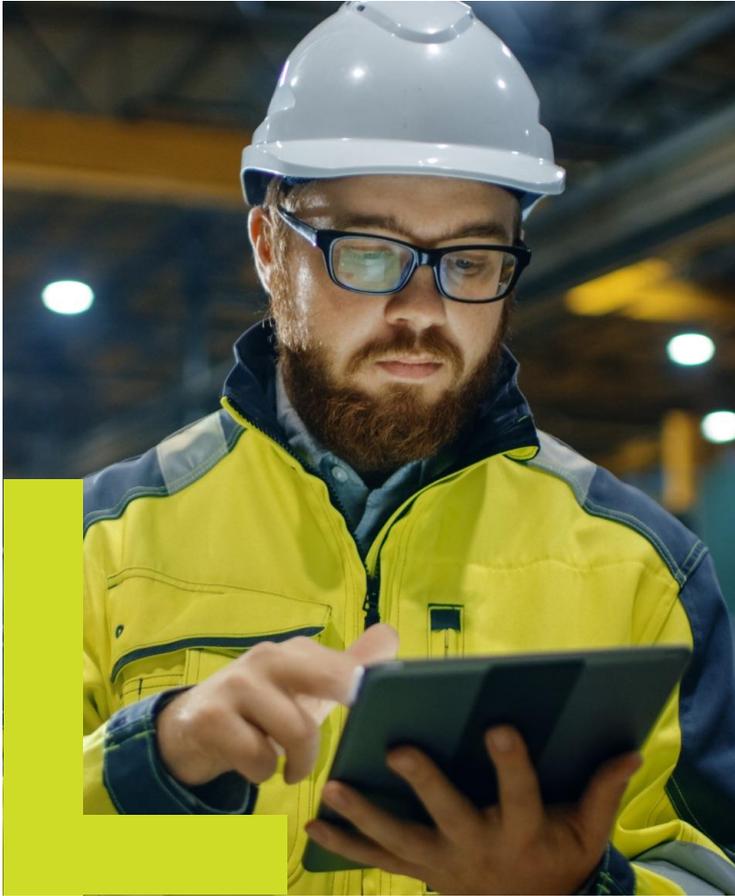

Ludan Engineering integrates permitting, authority engineering, design, procurement, construction supervision, and project management into a seamless force multiplier for your business. We **transform regulatory hurdles into fast-track approvals.** Complex designs into elegant solutions. Ambitious timelines into achieved milestones.

Part of Ludan Group

As part of the international Ludan Group, we combine global expertise with a deep understanding of the local context. This allows us to deliver **tailored, compliant, and cost-effective solutions** for both multinational and regional clients.

We don't just bring blueprints — **we bring vision**, execution, and reliability at every stage of a project.

A global network

Headquartered in Israel and active globally, the Ludan Group brings together specialized companies operating in fields such as **industrial engineering, automation, software integration, and environmental**. This global reach enables the group to stay at the forefront of innovation while maintaining a strong local presence in every market it serves.

Corporate structure

Subsidiaries in the engineering field

- Ludan Engineering Israel
250K mhr in 2024
- Ludan Engineering Romania
200k mhr. in 2024
- KH group, The Netherlands
& Belgium 800k mhr. in 2024

Subsidiaries in the systems integration field

- Ludan Software & Control Systems
- Symcotech, Public Transportation
- Ardan Control Tech
- Ludan Cyber Security

Subsidiaries and SPCs in the environmental and energy fields

- Ludan Environmental Technologies Israel
- Eco Tech, Emissions measurements, Israel
- Ludan Energy Overseas Israel, The Netherlands

Our history

1997

Foundation & Integration into Ludan Group

Ludan Engineering was established in Romania, and then became part of the Ludan Group's strategic expansion into Central and Eastern Europe, bringing international engineering standards to a growing regional market.

2006-2012

Consolidation of local expertise

The company strengthened its multidisciplinary engineering capabilities – including process, civil, mechanical, electrical, and automation – and began delivering complex projects for industries such as Oil & Gas, Chemicals, and Energy.

2013-2018

Expansion into regulated and critical sectors

Ludan Engineering expands its regional presence through partnerships with global industry leaders, combining local expertise with international best practices to deliver superior engineering solutions and exceptional project value.

2019-2024

Digital & environmental innovation

Ludan Engineering expanded into industrial software, control systems, and environmental engineering, delivering CO₂ capture, wastewater treatment, and biogas recovery projects. It also launched internal training programs to support continuous learning and leadership development.

2022-2024

Strengthening regional presence & major EPCM deliveries

Ludan Engineering successfully delivered large-scale EPCM projects in agriculture, energy, and petrochemicals, consolidating its role as a trusted partner for complex industrial investments.

2025

Looking ahead

Guided by the “Dare forward” mindset, Ludan is investing in people, innovation, and sustainability – aiming to become a regional leader in smart industrial engineering and energy transition projects.

Our history

Engineering powerhouse

123+

Expert professionals

190.000

Engineering hours annually

1000+

Successfully executed projects

50+

Industrial plant implementations

Services

Consultancy & advisory services

Ludan's consulting and advisory services provide the critical insights and strategic foundation that transform ambitious concepts into viable, profitable realities.

Engineering & design

Ludan's multidisciplinary engineering teams bring together diverse expertise to tackle your most complex challenges with creativity and precision.

Project Management

Ludan's project management services provide the leadership, systems, and expertise needed to deliver projects on time, within budget, and beyond expectations.

Services

Procurement & supply chain

Ludan's procurement and supply chain services leverage our global network and deep market knowledge to optimize every aspect of your supply chain.

Construction management

At Ludan, our Construction Management services ensure your project is delivered exactly as envisioned—on time, on budget, and with uncompromising quality and safety.

Operation & maintenance

Ludan's operations and maintenance services ensure that your assets continue delivering optimal performance long after commissioning.

Services

Sustainability & compliance

Ludan's sustainability and compliance services help you navigate evolving regulations while implementing solutions that reduce environmental impact.

Specialized sector services

Ludan's sector-specific services combine our comprehensive engineering capabilities with deep industry expertise to deliver solutions perfectly aligned with your sector's requirements.

Technical support

Our technical support services provide ongoing expertise to optimize performance, solve emerging challenges, and capitalize on new opportunities.

Our clients

We work with **clients across multiple geographical regions**, following unified workflows, standards, and procedures.

Through a robust communication platform, we maximize collaboration and performance, while using consistent tools and methods to achieve project goals. Our teams build **strong face-to-face relationships**, remaining flexible and adaptable to the specific requirements of each project.
